

# Hybrid Meeting

## HYBRID MEETING

Since we started organizing this conference 3 years ago, the world has changed considerably. A global pandemic has forever changed the way conferences are held, with the birth of a hybrid model where participants meet in person but also have the option to participate online for those who face restrictions or other reasons precluding travel.

We understand many of you are unable to come to London. We are keen to deliver a hybrid programme that will still allow meaningful participation for online participants. This would consist of recorded talks, invited live experts and selected free paper sessions at different time zones.

Collaboration with several countries, especially in Asia, have allowed us to organise a bespoke hybrid programme that promises to be an exciting conference for those who are logging in from their homes in various countries, despite the differences in time zones.

## SATELLITE MEETING

A hybrid programme also allows an exciting opportunity for different countries/regions to organise local satellite meetings to incorporate their own scientific and social programmes. The local organizing committee can arrange to have their own Q and A session following participation of the IFSSH live streaming or recorded sessions. We can also arrange live expert participation from London. If you wish to organise a satellite meeting please contact us.

## HYBRID PROGRAMME IFSSH 2022 (CATERING TO TIME ZONE OF GMT+7 HOURS)

## HYBRID PROGRAMME COMMITTEE:

We are very grateful to the following committee members, who have provided valuable input into the planning and support of this hybrid programme:

Hong Chen (China)  
Andrew Chin (Singapore)  
Christy Fowler (UK)  
Yang Guo (China)  
Jonathan Hobby (UK)  
PC Ho (Hong Kong, China)  
David Izadi (UK)  
Wee Lam (UK)  
Jie Lao (China)  
Pauline McGee (UK)  
Toshi Nakamura (Japan)  
Raja Sabapathy (India)  
Wen Tian (China)  
Wendong Xu (China)
